New FleetCommander Features & Engineering Update

Last Year to Today

- 5.12 released
 - 5.11 combined with 5.12 summer of 2023
 - Multiples rounds of Beta (Winter of 2023-2024)
 - Addressed support issues with additional releases
 - Targeting to wrap up release with 5.12.21
- 5.13 is coming!
 - QA team testing
 - Regression testing starting soon after
 - Targeted to be the final .NET push in the Core product
- Versions after.....
 - Introducing Version 6!!!!!!!

5.12 Highlights

Agile Product Commitment

Agile's FleetCommander release schedule is designed to provide periodic releases providing enhanced value to you as part of your Maintenance and Support agreement.

- FleetCommander's Core modernization and upgrade program is provided at no additional cost to you. Unlike our competitors that charge upgrade fees, or make you purchase a new release!
- Our upgrade methodology is designed to be transparent to you, minimize your risk while keeping your operations running at 100% and your data secure.
- Our .NET modernization provides increased speed, capabilities, and stability throughout FleetCommander.
- .NET allows the expansion and addition of FleetCommander features that take advantage of the latest technologies.
- Improved stability and security provide a robust foundation for your business.

.NET Modernization

The following interfaces have been upgraded in the 5.11/12:

- .NET Transition: Manage > Users
- .NET Transition: Manage > Vehicles
- .NET Transition: Manage > Work Orders
- .NET Transition: Manage > Maintenance
- .NET Transition: Manage > Fuel
- .NET Transition: Manage > Inspection
- .NET Transition: Manage > Prep
- .NET Transition: Reports > Statistics > Aging by Miles Report
- .NET Transition: Reports > Statistics > Aging by Time
- .NET Transition: Reports > Statistics > Audit Log Report
- .NET Transition: Reports > Statistics > Feedback Report
- .NET Transition: Reports > Statistics > Product Key Survey Report
- .NET Transition: Reports > Statistics > Statistics Summary Report
- .NET Transition: Reports > Statistics > System Report
- .NET Transition: Reports > Statistics > Vehicle Demand Report
- .NET Transition > Reports > Maintenance > Parts Markup Detail Report
- .NET Transition > Reports > Maintenance > Work Order Status History Report
- .NET Transition: Reports > Maintenance > Inventory Summary Report
- .NET Transition: Reports > Maintenance > Maintenance and Fuel Cost Report
- .NET Transition: Reports > Maintenance > Maintenance Cost Detail
- .NET Transition: Reports > Maintenance > Maintenance Cost Summary by Cost Type
- .NET Transition: Reports > Maintenance > Maintenance Cost Summary by Task Type
- .NET Transition: Reports > Maintenance > Maintenance Due Summary Report
- .NET Transition: Reports > Maintenance > Maintenance Schedule Report
- .NET Transition: Reports > Maintenance > Maintenance Tasks Report
- .NET Transition: Reports > Maintenance > Part Detail Report
- .NET Transition: Reports > Maintenance > Part Sales Report
- .NET Transition: Reports > Maintenance > Part Summary Report
- .NET Transition: Reports > Maintenance > Service Providers Report
- .NET Transition: Reports > Maintenance > Technician Task and Labor Hours Report
- .NET Transition: Reports > Maintenance > Technician Time Summary by Category Report
- .NET Transition: Reports > Maintenance > Technician Time Summary Report
- .NET Transition: Reports > Maintenance > Technician Work Report
- .NET Transition: Reports > Maintenance > Work Order Billing Report
- .NET Transition: Reports > Maintenance > Work Order Parts Report

Vehicle Import Tool

Vehicle Import Tool

System Administrators can now batch import vehicles into FleetCommander!

Vehicles can only be Added to the system

There are two type of import files provided – Excel (.xlsx) or Text (.txt)

- Click the desired link to download the sample file for the template and layout
 - Adhere to the import rules
 - The template must have all required fields populated
 - The template must contain all columns to ensure a successful import.
 - The template will not work if columns are deleted

Vehicle Import

Select a ".txt" tab-delimited or a ".xlsx" file to upload and click "Next" to continue.

[Download a Sample Vehicle Import .xlsx File](#)
[Download a Sample Vehicle Import .txt File](#)

Select a File: No file chosen

Vehicle Import Tool

Vehicle Import

Select a **".txt"** tab-delimited or a **".xlsx"** file to upload and click "Next" to continue.

[Download a Sample Vehicle Import .xlsx File](#)
[Download a Sample Vehicle Import .txt File](#)

Select a File: No file chosen

The Excel and Text Templates contain examples as a guide. Delete these rows BEFORE you import the file.

Excel – Preferred Template:

	A	B	C	D	E	F	G	H	I	J	K	L	M
1	Asset Name	VIN	License Number	Year	Color	Make	Model	First Mileage	Last Mileage	Last Mileage Date	Site	Location	Type
2	Sample Chevy	S234D9D92K29KD923K	ABC123	2008	Silver	Chevrolet	Traverse	10	5,000	1/1/2022	Home Office Site	Parking Garage	1/2 TON PICKUP 4WD
3	3A0318513	1ABCM81713A031513	AVC321	2020	Beige	Toyota	Highlander	10	5,000	1/1/2022	West Location Site	Parking Garage	Handicap Van
4	South Lot Ford	X32239D92K29KD923K	XWS222	2022	Silver	Ford	Explorer	10	425	1/1/2022	Lambeau Site	East Lot	Compact SUV

Vehicle Import Tool – Required Fields

- Asset Name
- VIN
- License Number
- Year
- Make
- Model
- First Mileage
- Last Mileage
- Last Mileage Date
- **Site - Must match system values**
- **Location - Must match system values**
- **Asset Type - Must match system values**
- Maximum Occupants
- First Available Date
- Acquisition Value – i.e. - **21,999.99**
- Expected Max Age in Months i.e. **60**
- Expected Max Age in Miles – i.e. **60,000**
- Eligible for Manual Assign? **Y/N**
- Eligible for Auto-Assign? **Y/N**
- Eligible for Automatic Approval? **Y/N**
- Enable Self Checkout **Y/N**
- Expected Miles per Month - - **Expected age in Miles/Expected Age in Months**
- Fuel Capacity – Number of Gallons

- ✓ Your template **MUST** contain all required fields!
- ✓ Make sure you use values that are consistent with your system configuration and table setup
- ✓ If values are entered that do not match system values the system will show an error when trying to import the file

Vehicle Import Tool – Optional Fields

- ✓ Make sure you use values that are consistent with your system configuration and table setup.
- ✓ If values are entered that do not match system values the system will show an error when trying to import the file

- Color
- **Owner User or Department – Department value or User Name**
- **Responsible User or Department – Department value or User Name**
- Acquisition Date
- Last Available Date
- Public Notes
- Private Notes
- Vehicle Condition
- **Fuel Type – Must match system values**
- Gross Weight (GVWR)
- **Asset Custom Fields 1-20 – These are individual columns**
- Maintenance Plan
- Account Number
- Depreciation Information
 - Salvage Value Percentage
 - Expected Cost Increase Percentage
 - Do Not Depreciate – Y/N
- Disposal Date

Vehicle Import Tool

Vehicle Import

Select a ".txt" tab-delimited or a ".xlsx" file to upload and click "Next" to continue.

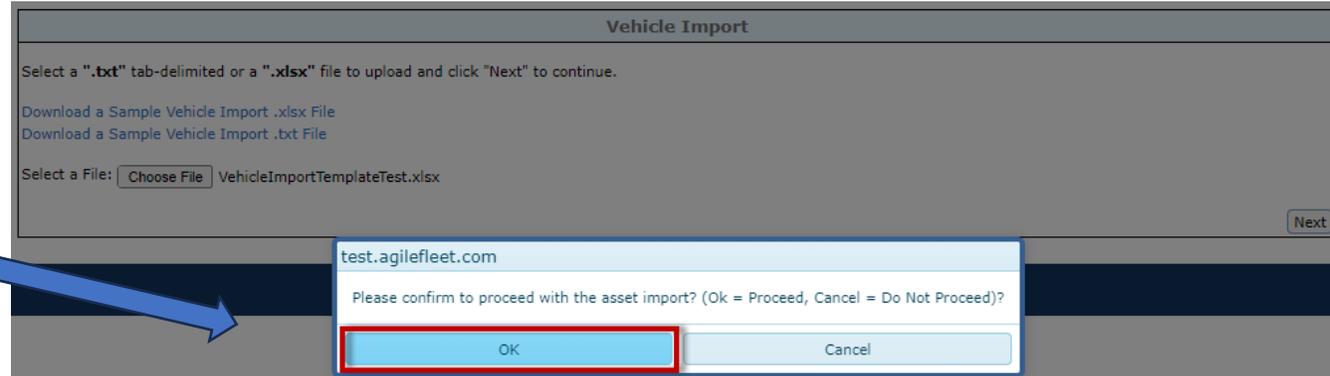

[Download a Sample Vehicle Import .xlsx File](#)
[Download a Sample Vehicle Import .txt File](#)

Select a File:

- Choose file
- The selected file name will be shown to the Right of the **Choose File** button
- After the file is selected, click "Next"

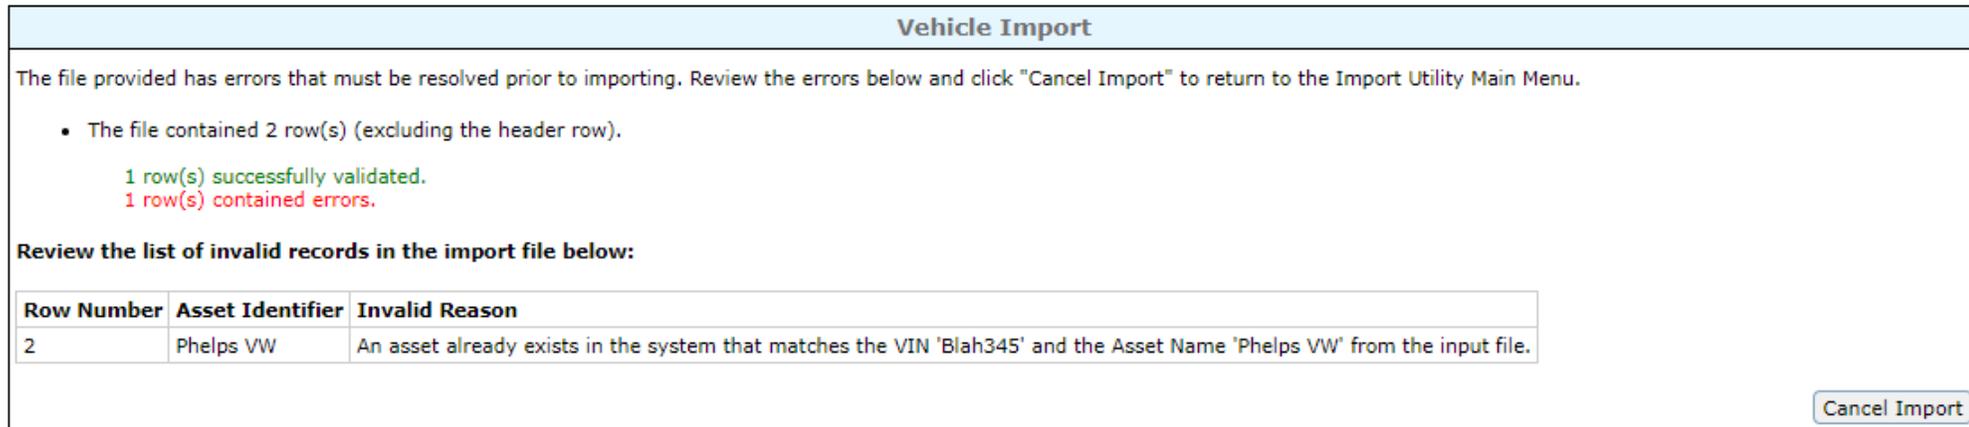

Vehicle Import Tool

You will need to confirm the import by clicking 'OK'

The screenshot shows the 'Vehicle Import' interface. At the top, it says 'Select a ".txt" tab-delimited or a ".xlsx" file to upload and click "Next" to continue.' Below this are links to 'Download a Sample Vehicle Import .xlsx File' and 'Download a Sample Vehicle Import .txt File'. A file selection field shows 'VehicleImportTemplateTest.xlsx' with a 'Choose File' button. A 'Next' button is in the bottom right. A modal dialog box is open, displaying 'test.agilefleet.com' and the question 'Please confirm to proceed with the asset import? (Ok = Proceed, Cancel = Do Not Proceed)?'. The 'OK' button is highlighted with a red border, and a blue arrow points from the text box to it.

The file will only be imported if all records are in the correct format, all required fields are completed, and all vehicles are new to FleetCommander. If there are errors, they will be displayed

The screenshot shows the 'Vehicle Import' interface with an error message. The message states: 'The file provided has errors that must be resolved prior to importing. Review the errors below and click "Cancel Import" to return to the Import Utility Main Menu.' Below the message is a list of errors: 'The file contained 2 row(s) (excluding the header row). 1 row(s) successfully validated. 1 row(s) contained errors.' The text 'Review the list of invalid records in the import file below:' is followed by a table with the following data:

Row Number	Asset Identifier	Invalid Reason
2	Phelps VW	An asset already exists in the system that matches the VIN 'Blah345' and the Asset Name 'Phelps VW' from the input file.

A 'Cancel Import' button is located in the bottom right corner of the interface.

The file must be updated before the import can be processed. Click "Cancel Import" to select the newly updated file

Vehicle Import Tool

- Once the file has been validated successfully, you are now able to select the Access Groups and Usage Types to assign to the vehicles.
- A minimum of 1 Access Group and 1 Usage Type must be selected for the import.
- Important:** The Access Groups and Usage Types selected will be set against all of the vehicles being imported in the file

If you need to set different Access Group and Usage Type combinations, you will need to create multiple imports or edit records manually post import

Review the list of validated records to ensure the format looks as expected prior to completing the import.

Row Number	Asset Name	VIN	License Number	Year	Color	Make	Model	Site	Location	Type	Max Occupants
2	Unit 42	BC985667820FC	258032	2016	Silver	Ford	Fusion	Philadelphia Campus	Lincoln Financial Field	Mid-sized Sedan	7
3	Unit 546	XC985643820FD	258025	2017	Silver	Ford	Fusion	Philadelphia Campus	Lincoln Financial Field	Mid-sized Sedan	7

[Complete Import](#) [Cancel Import](#)

Vehicle Import

The input file has been validated successfully. To complete the vehicle import, select the "Access Groups" and "Usage Types" to associate to every vehicle from the import files. Once all "Access Groups" and "Usage Types" are selected, click the "Complete Import" button to finish the import. Click the "Cancel Import" button to cancel this import and return to the Vehicle Import upload page.

The file contained 2 row(s) (excluding the header row) and all rows loaded successfully. Select at least one Access Group and one Usage Type to assign to each vehicle in the import file.

Access Group(s): <input checked="" type="checkbox"/> Standard <input checked="" type="checkbox"/> Chauffeur <input checked="" type="checkbox"/> Disaster Response <input checked="" type="checkbox"/> PHHS <input checked="" type="checkbox"/> 15-Pass Van Trained <input checked="" type="checkbox"/> 5-ton+ and below <input checked="" type="checkbox"/> Bus <input checked="" type="checkbox"/> Defensive Driver <input checked="" type="checkbox"/> 10-ton & below	Usage Type(s): <input checked="" type="checkbox"/> Daily Rental <input checked="" type="checkbox"/> Department <input checked="" type="checkbox"/> External Rental
---	--

[Select All](#) | [Deselect All](#)

Review the list of validated records to ensure the format looks as expected prior to completing the import.

Row Number	Asset Name	VIN	License Number	Year	Color	Make	Model	Site	Location	Type	Max Occupants
2	Unit 42	BC985667820FC	258032	2016	Silver	Ford	Fusion	Philadelphia Campus	Lincoln Financial Field	Mid-sized Sedan	7
3	Unit 546	XC985643820FD	258025	2017	Silver	Ford	Fusion	Philadelphia Campus	Lincoln Financial Field	Mid-sized Sedan	7

[Complete Import](#) [Cancel Import](#)

Vehicle Import Tool

- Ensure you review the list of assets to be imported, then press “complete import.”
- Remember - If you find an error, Select ‘Cancel Import’, correct the data, and reload the data file

Review the list of validated records to ensure the format looks as expected prior to completing the import.

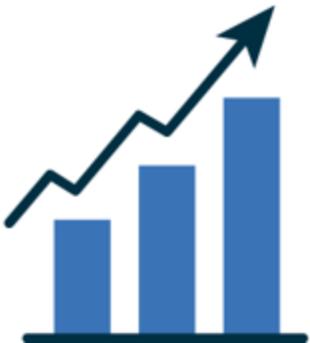

Row Number	Asset Name	VIN	License Number	Year	Color	Make	Model	Site	Location	Type	Max Occupants
2	Unit 42	BC985667820FC	258032	2016	Silver	Ford	Fusion	Philadelphia Campus	Lincoln Financial Field	Mid-sized Sedan	7
3	Unit 546	XC985643820FD	258025	2017	Silver	Ford	Fusion	Philadelphia Campus	Lincoln Financial Field	Mid-sized Sedan	7

Once you select Complete Import, the file will be processed, and a confirmation page will be displayed when complete.

Vehicle Import

The vehicle import process has completed. 2 vehicles have been successfully imported into the FleetCommander system.

Vehicle Replacement

Vehicle Replacement – Phase 1

The vehicle replacement tool groups functionality that allows administrators to determine which vehicles in their fleet are most appropriate to replace as well as the approximate cost of acquisition to replace those vehicles.

- The Replacement model is a **Points** based system based on configurable categories
 - Higher Points identify vehicles to be replaced
- There will be multiple releases for this functionality, each adding additional capability
- Phase 1 includes:
 - Three Configurable Categories for Scoring and Weighting of
 - Age of Vehicle
 - Odometer
 - Replacement Condition
 - Changes to Vehicle Profile to include Replacement Condition
 - Vehicle Replacement Report

Vehicle Replacement

Configure Vehicle Replacement Categories

- Configure > Vehicles > Replacement
 - Categories
 - Age
 - Meter
 - Replacement Condition
 - Age + Odometer + Replacement Condition = Total Points that determines the Category it falls under
 - All ranges behave the same way
 - Enter the upper limit for the range for each row and the corresponding points for each row.
 - You **cannot** overlap the range.
 - Fewer points means better overall condition (e.g. 1= excellent, 2= good)

Vehicle Replacement

Configure Vehicle Replacement Categories - Age

This is based on the Model Year of the vehicle to determine its points

Categories | **Age** | Meter | Replacement Condition

Each row represents an age range and associated points. As a general rule, fewer points means better quality (e.g., 1 = Excellent, 2 = Good).

Enter the upper limit for the range for each row and the corresponding points for each row. Up to five new blank rows will appear after saving changes.

Year Range*	to	<	Points*
>= 0	to	< 2	1
>= 2	to	< 4	3
>= 4	to	< 6	5
>= 6	to	< 8	7
>= 8	to	< 10	10
>= 10	to	< 100	20
>= 100	to	<	
>= 100	to	<	
>= 100	to	<	
>= 100	to	<	
>= 100	to	<	
>= 100	to	<	

Undo Changes Save Changes

Vehicle Replacement

Configure Vehicle Replacement Categories – Meter

Based on the Mileage of the vehicle correlate the odometer range of the vehicle with points

Categories | Age | **Meter** | Replacement Condition

Each row represents a meter range and associated points. As a general rule, fewer points means better quality (e.g., 1 = Excellent, 2 = Good).

Enter the upper limit for the range for each row and the corresponding points for each row. Up to five new blank rows will appear after saving changes.

Meter Range*	to		Points*
>= 0	to	< 25000	3
>= 25000	to	< 50000	5
>= 50000	to	< 75000	7
>= 75000	to	< 100000	9
>= 100000	to	< 1000000	20
>= 1000000	to	<	
>= 1000000	to	<	
>= 1000000	to	<	
>= 1000000	to	<	
>= 1000000	to	<	

Undo Changes Save Changes

Vehicle Replacement

Configure Vehicle Replacement Categories – Replacement Condition (Condition of the Vehicle)

- Set categories for the condition of a vehicle and assign points to that condition.
- ‘Default’ – The default replacement condition of the vehicle based on your fleet

Categories | Age | Meter | Replacement Condition

Each row represents a meter range and associated points. As a general rule, fewer points means better quality (e.g., 1 = Excellent, 2 = Good).

Enter the upper limit for the range for each row and the corresponding points for each row. Up to five new blank rows will appear after saving changes.

Condition*	Points*	Default	Active	Sort Order*
Excellent	1	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	1
Good	2	<input type="checkbox"/>	<input checked="" type="checkbox"/>	2
Fair	5	<input type="checkbox"/>	<input checked="" type="checkbox"/>	3
Poor	10	<input type="checkbox"/>	<input checked="" type="checkbox"/>	4
Unsafe	25	<input type="checkbox"/>	<input checked="" type="checkbox"/>	5
		<input type="checkbox"/>	<input type="checkbox"/>	
		<input type="checkbox"/>	<input type="checkbox"/>	
		<input type="checkbox"/>	<input type="checkbox"/>	

Undo Changes Save Changes

Vehicle Replacement

Vehicle Profile

- 2 fields have been added to Vehicle Profiles
 - “Include in Replacement Report” toggle
 - “Replacement Condition” dropdown that matches the options configured.
 - Will display the Defaulted option

Expected Cost Increase %:

Do Not Depreciate:

Additional Information

Eligible for Manual-Assign? Yes No (This vehicle is eligible to be chosen by a user for a reservation.)

Eligible for Auto-Assign? Yes No (This vehicle is eligible to be automatically assigned to a reservation.)

Eligible for Automatic Approval? Yes No (Reservations with this vehicle are able to be automatically approved for eligible users.)

Include in Replacement Reporting? Yes No

Replacement Condition:

Vehicle Replacement

Configure Vehicle Replacement Categories - Categories

- A vehicle's points will be summarized, and its total points will place it into one of these categories
- This populates the Vehicle Replacement Condition

Categories	Age	Meter	Replacement Condition
Each row represents a rating category and associated points. As a general rule, fewer points means better quality (e.g., 1 = Excellent, 2 = Good).			
Enter the rating category label and corresponding upper limit for the point range for each row. Up to five new blank rows will appear after saving changes.			
Category*			Point Range* (1000 max)
<input type="text" value="Excellent"/>			>= 0 to < 10
<input type="text" value="Good"/>			>= 10 to < 20
<input type="text" value="Fair"/>			>= 20 to < 40
<input type="text" value="Poor - Replace"/>			>= 40 to < 60
<input type="text" value="Unsafe - Replace"/>			>= 60 to < 999
<input type="text"/>			>= to < 0
<input type="text"/>			>= to < 0
<input type="text"/>			>= to < 0
<input type="text"/>			>= to < 0
<input type="text"/>			>= to < 0
<input type="text"/>			>= to < 0
<input type="button" value="Undo Changes"/> <input type="button" value="Save Changes"/>			

Vehicle Replacement

Replacement Report

- Reports > Assets > Vehicle Replacement
 - “Replacement Condition” dropdown that matches the options configured.
 - Will display the Defaulted option if not yet set manually
 - Export options in HTML and Excel

TCO Expense Summary Report

- Improved performance
- Added new columns
 - Total Expense (in Period)
 - Total Expense (Life to Date)

TCO Mapping Tool

- Map specific TCO transactions to reservations using a tool!
- Navigation for the TCO Mapping Tool is not being added automatically due to calculation and export considerations.

TCO Mapping Tool		
When billing charges are generated for the mapped TCO records, they will be attributed to the billing charge types allocated below.		
Map TCO transactions for the following TCO Subcategories:

TCO Enhancements

TCO and Tax Exemptions

- Under TCO Subcategories added configuration to add, subtract or ignore taxes
- Added columns to TCO Tab to show Taxes and Exemptions

Handling Taxes

Tax 1 - How should the tax be handled if the transaction is marked exempt?

- When exempt, subtract Tax 1 from total. (Total = Qty * Rate - Tax 1)
- When exempt, ignore Tax 1. (Total = Qty * Rate)

Tax 1 - How should the tax be handled if the transaction is NOT marked exempt?

- When not exempt, add Tax 1 to total. (Total = Qty * Rate + Tax 1)
- When not exempt, ignore Tax 1. (Total = Qty * Rate)

Tax 2 - How should the tax be handled if the transaction is marked exempt?

- When exempt, subtract Tax 2 from total. (Total = Qty * Rate - Tax 2)
- When exempt, ignore Tax 2. (Total = Qty * Rate)

Tax 2 - How should the tax be handled if the transaction is NOT marked exempt?

- When not exempt, add Tax 2 to total. (Total = Qty * Rate + Tax 2)
- When not exempt, ignore Tax 2. (Total = Qty * Rate)

Tax 3 - How should the tax be handled if the transaction is marked exempt?

- When exempt, subtract Tax 3 from total. (Total = Qty * Rate - Tax 3)
- When exempt, ignore Tax 3. (Total = Qty * Rate)

Tax 3 - How should the tax be handled if the transaction is NOT marked exempt?

- When not exempt, add Tax 3 to total. (Total = Qty * Rate + Tax 3)
- When not exempt, ignore Tax 3. (Total = Qty * Rate)

5.13 .NET Modernization

Reference links need updating

- Any layout and policy links referencing legacy Classic .ASP interfaces or displaying broken links will need to be updated by clients
 - References to the old Classic .ASP interfaces will need to now reference their corresponding .NET interfaces.
 - A broken image or non-functional HTML anchor will need to have its URL corrected.
 - HTML anchors such as “Top” references on the policy page will have to be updated
- Dynamic fields will not have to be modified by the client

Instructions

3 easy steps

Our goal is to make the process of requesting reservations and checking or updating reservations easier for you. If you are not yet registered as a FleetCommander user ([Sign Up Now!](#)), you can start making reservations today.

A basic overview of the Motor Pool's on-line vehicle reservation process is listed below. Please **follow these three easy steps:**

https://agilefleet.com/_UserRegistration.asp

Receive Confirmation

Requests are responded to within 1 hour (during normal business hours) with the status of "Approved". You will receive an email notifying you of your reservation status.

At any time, [My Schedule](#) may be used to view the status of your reservation request(s).

Note: If your reservation request is "Rejected" or "Cancelled" then you will receive an email with the reason.

https://agilefleet.com/fleetcommander/_MyScheduleBrowse.asp?Request=Current

5.13 .NET Modernization

Saved Defaults Will Not Transfer to .NET Interfaces

- If you have customized filters saved as defaults on any of the FleetCommander interfaces that have transitioned over to .NET for this release, you will need to customize them and save them as defaults again on the .NET interfaces.

The screenshot shows the 'Dashboard Filters' dialog box in the FleetCommander application. The dialog is open over a dashboard view. The dashboard includes sections for 'Vehicles Departing', 'Vehicles Returning (0)', 'Motor Pool Activity', and 'Customer Satisfaction'. The 'Dashboard Filters' dialog has the following settings:

- Show for Date: 09/18/2024
- Refresh Interval: 5 min
- Site(s): Louisville Motor Pool, Frankfort Pool
- Usage Type: All Usage Types, Daily Rental, test, Long Term
- Location(s): All Locations, Louisville Motor Pool: Parking Garage, Frankfort Pool: Parking Lot A
- Vehicle Type: All Vehicle Types, 1/2 Ton Truck, CDL, Compact Sedan
- Display Options: Two-line Display for Vehicles Departing/Returning
- Vehicles Departing: Driver's Last Name
- Vehicles Returning: Driver's Last Name
- View Fleet Capacity Graph
- View Customer Satisfaction Gauge

Buttons at the bottom of the dialog include 'Clear Defaults', 'Save Defaults', and 'Apply Filter'. A mouse cursor is hovering over the 'Save Defaults' button.

5.13 .NET Modernization

URL Changes Coming

- Kiosk Start URLs will need to be updated in KioWare
 - [https://\[yoursite\].agilefleet.com/kiosk/?kioskid=1](https://[yoursite].agilefleet.com/kiosk/?kioskid=1) will be phased out
- Single sign on URLS will need to be updated
 - [https://\[yoursite\].agilefleet.com/fleetcommander/login.asp](https://[yoursite].agilefleet.com/fleetcommander/login.asp) will be phased out
- Both of these efforts will be communicated as we get closer to the release.
 - .NET URLs will be announced
 - Redirects will be in place for a period of time
 - SSO updates will be coordinated per client to allow for your technical resource coordination

API Available

API Gateway is now available!

- Update information in FleetCommander via the API Gateway
 - User Management such as Create New Users
 - Update Department table
 - Update Account table
- This is available today with 5.12, some additional fields will be added in 5.13 and in other future releases

Create User

POST /users Create user profile

This method creates a single user record and returns the userid value for the new record. It requires a well-formed JSON string as its parameter.

```
{
  "firstName": "string",
  "middleName": "string",
  "lastName": "string",
  "suffix": "string",
  "address1": "string",
  "address2": "string",
  "address3": "string",
  "city": "string",
  "stateOrProvince": "string",
  "county": "string",
  "postalCode": "string",
  "country": "string",
  "preferredEmail": 0,
  "email1": "string",
  "email2": "string",
  "preferredPhone": 0,
  "phone1": "string",
  "phone1Extension": "string",
  "phone2": "string",
  "phone2Extension": "string",
  "phone3": "string"
}
```

COMMAND 24

Password Token Removed

Welcome Email Text

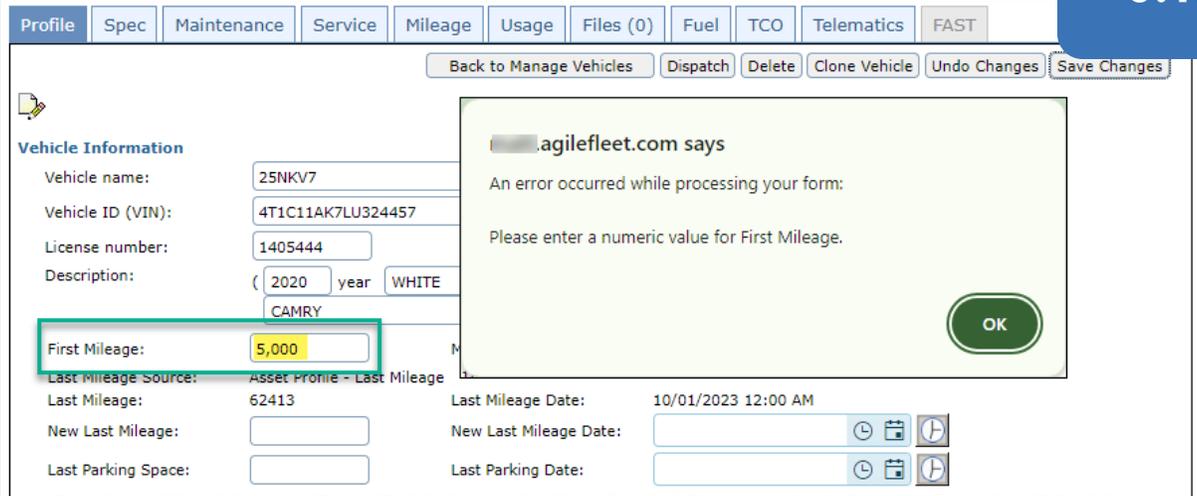

- Password token will no longer be available
- If the token is included in the body of the email, the following message will be sent in place of the password: *You can reset your password via the "Forgot Password" link on the login page.*

The screenshot displays an email configuration window titled "Welcome Email Text". The "Email subject text (if applicable):" field contains "Welcome to @@SiteName@@ [It's cool]". The "HTML Format (check if wanted):" checkbox is checked. Below the text area, a list of tokens is shown: Name: @@FullName@@, User Name: @@UserName@@, Password: @@Password@@, and URL: @@WebURL@@. The "Password" token is highlighted in yellow. A modal dialog titled "Insert a Token" is open, showing a list of tokens: Password, ContactName, EMailAddress, FirstName, FullName, LastName, MiddleName, Password, PhoneNumber1, UserName, and WebURL. The "Password" token in the list is crossed out with a red 'X'. The "Insert" button is highlighted, and a mouse cursor is pointing at it. The background text in the email editor includes: "You will have to use your Associat...", "welcome to the HAM Vehicle Admi...", "provides easy-to-use forms and b...", "Other benefits:", "* HVAS is working 24 hours a day, 7...", "* Your request won't get lost - it's al...", "ContactName@@ Hello and...", "internet-based system that...", "M vehicle programs on-line.", "e within the system.", "Cancel Edit Save Changes", and "Modified:6/24/2024 7:39 AM|jmonroe".

Manage Vehicles: Comma Error Resolved

5.12

Currently, if a comma is present in a numeric field on the asset's Profile tab, you would not be able to save the profile without removing the comma

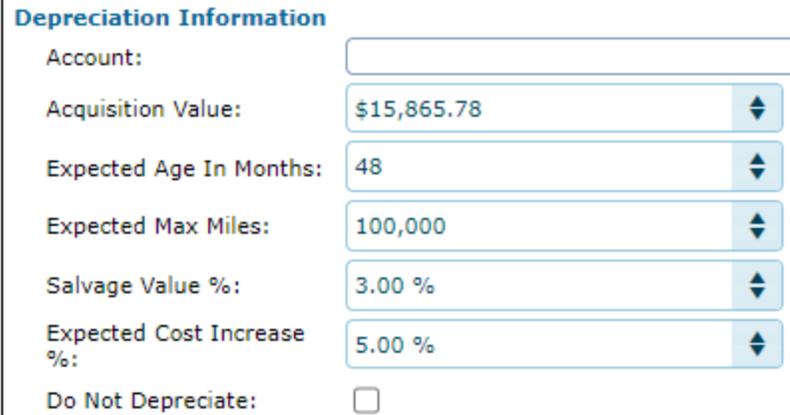

The screenshot shows the 'Profile' tab of a vehicle management system. The 'Vehicle Information' section includes fields for Vehicle name (25NKV7), Vehicle ID (VIN) (4T1C11AK7LU324457), License number (1405444), and Description (2020 year WHITE CAMRY). The 'First Mileage' field contains '5,000' and is highlighted with a red box. An error message box is overlaid on the form, stating: 'agilefleet.com says An error occurred while processing your form. Please enter a numeric value for First Mileage.' The error box has an 'OK' button. Navigation buttons at the top include 'Back to Manage Vehicles', 'Dispatch', 'Delete', 'Clone Vehicle', 'Undo Changes', and 'Save Changes'.

In 5.13, the text boxes have been replaced with numeric only fields.

5.13

Depreciation Information

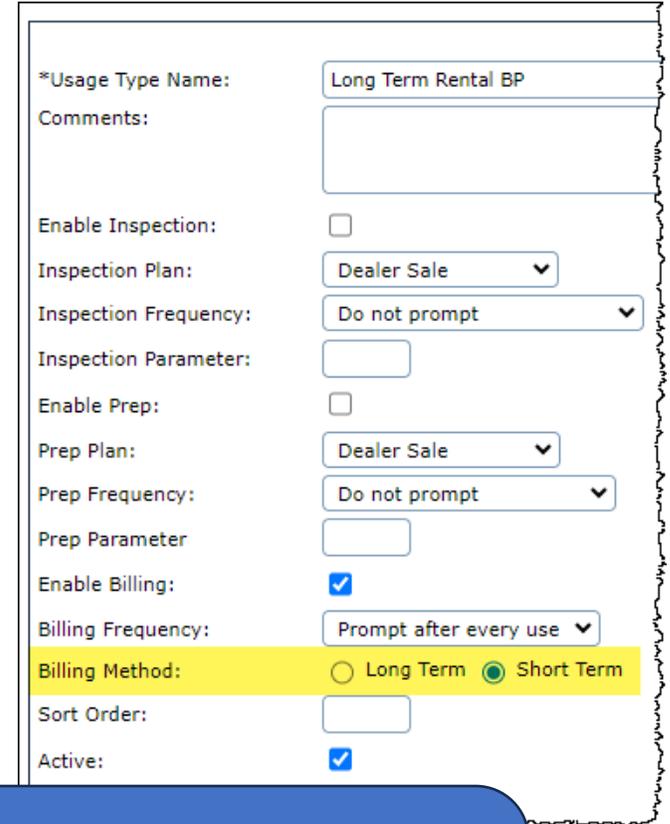

The screenshot shows the 'Depreciation Information' section of the vehicle profile form. It includes the following fields: Account (empty text box), Acquisition Value (\$15,865.78), Expected Age In Months (48), Expected Max Miles (100,000), Salvage Value % (3.00 %), Expected Cost Increase % (5.00 %), and Do Not Depreciate (checkbox). Each value field is a numeric-only input with a dropdown arrow on the right.

Usage Type Billing Method Addition

Usage Types: “Billing Method” added to distinguish between short-term and long-term billing.

- Distinguishing whether a usage type should be billed for short-term or long-term usage will facilitate the creation of client-specific billing algorithms that do not require hardcoding which usage types should be excluded.
- The Billing Method will have two radio buttons, one each for Long Term and Short Term.
- By default, Short Term will be selected.

*Usage Type Name: Long Term Rental BP

Comments:

Key Control Enhancements

SmartFob Key Box

Benefits

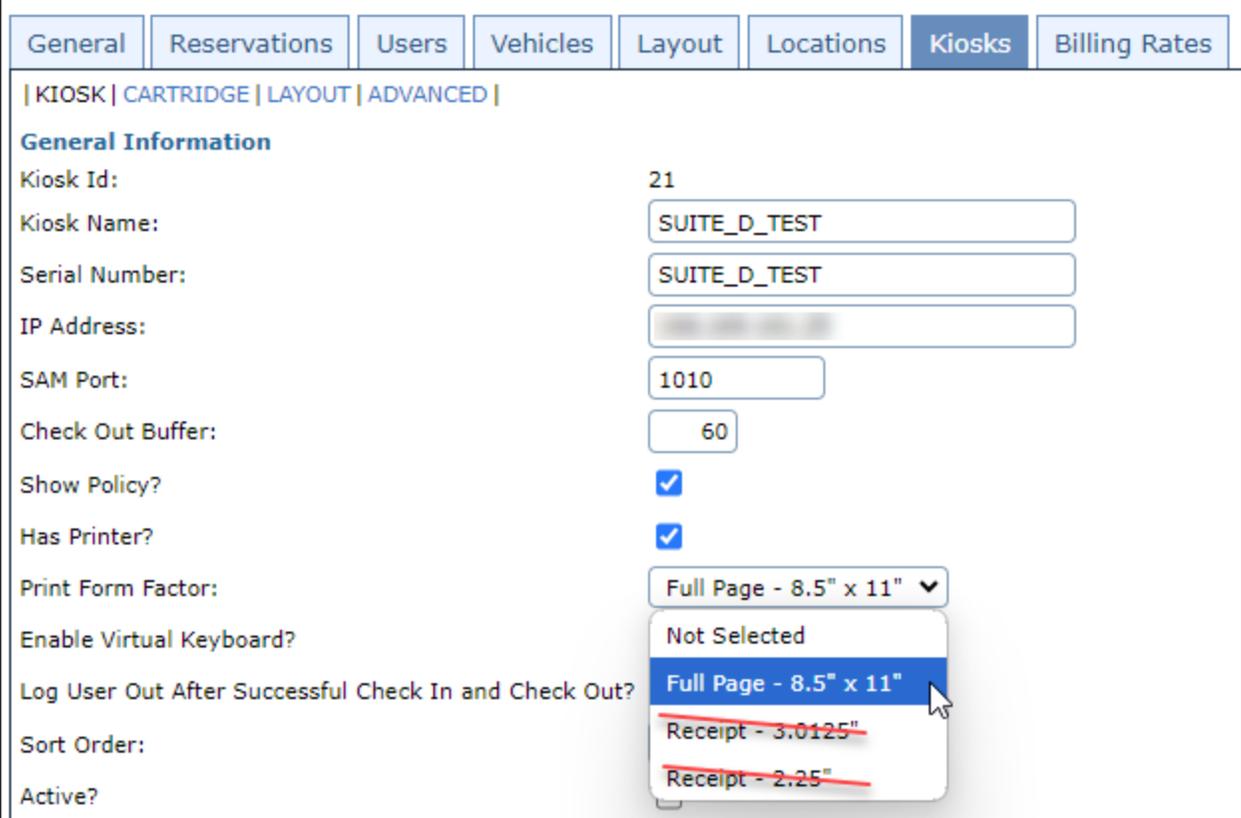

- No key to turn. Easy in and out.
- Can return to any position
- If fob is lost, no custom replacement fobs required. Fobs are generic.
- Key ring doesn't bind
- Mail-slot no longer has switch in cardholder.

Kiosk Printer Modification

Kiosk Receipt Printers: 8.5" x 11" form factor is now the only option.

- Options for the 3.0125" and 2.25" receipt printers will be removed

The screenshot shows a web-based configuration interface for a kiosk. The top navigation bar includes tabs for General, Reservations, Users, Vehicles, Layout, Locations, Kiosks, and Billing Rates. The current page is titled 'KIOSK | CARTRIDGE | LAYOUT | ADVANCED'. Under the 'General Information' section, various fields are visible: Kiosk Id (21), Kiosk Name (SUITE_D_TEST), Serial Number (SUITE_D_TEST), IP Address (blurred), SAM Port (1010), Check Out Buffer (60), Show Policy? (checked), Has Printer? (checked), Print Form Factor (dropdown menu), Enable Virtual Keyboard?, Log User Out After Successful Check In and Check Out?, Sort Order, and Active?. The 'Print Form Factor' dropdown menu is open, showing four options: 'Full Page - 8.5" x 11"' (selected), 'Not Selected', 'Receipt - 3.0125"' (crossed out), and 'Receipt - 2.25"' (crossed out).

Field	Value
Kiosk Id	21
Kiosk Name	SUITE_D_TEST
Serial Number	SUITE_D_TEST
IP Address	[REDACTED]
SAM Port	1010
Check Out Buffer	60
Show Policy?	<input checked="" type="checkbox"/>
Has Printer?	<input checked="" type="checkbox"/>
Print Form Factor	Full Page - 8.5" x 11" (selected)
Enable Virtual Keyboard?	Not Selected
Log User Out After Successful Check In and Check Out?	<input type="checkbox"/>
Sort Order	
Active?	<input type="checkbox"/>

Engineering Team Updates

Engineering Team Changes Underway!

- New Product Manager!
 - Feedback more quickly being reviewed and prioritized
 - New initiatives for gathering more frequent Client feedback coming soon
 - Product roadmap to organize and communicate high-level goals
- QA team
 - Added additional resources
 - Continued focus on Automation
 - Documented test cases
- Development Team
 - Added additional resources
 - Shorter release cycles (targeting quarterly releases)

Engineering Changes Underway!

- FedRAMP
 - Third party audit in final phase
 - Targeting first ATO first half of 2025
- .NET custom development
 - Stop by 'Tech Tune-up' area if you have custom work

COMMAND 24

Reservation Reassignment

Reassign Asset Reservations

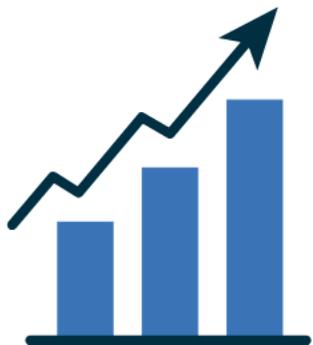

COMMAND 24

CAB Update

- CAB met yesterday and had an excellent session on future priorities.
- If anyone else is interested, talk to Tech Tune Up team!
- Top 5 Feedback Items:
 - Drag and Drop for Reservation Reassignments
 - UI Updates and Enhancements
 - Mobile Friendly (Responsive)
 - Electric Vehicle Support
 - API Enhancements

Activity Time!

CAB Update

- Place your stickers on your most desired features of the following:
 - 'Drag and Drop' for Reservation Reassignment
 - UI Upgrade and Enhancements
 - Electric Vehicle Support
 - Mobile Friendly (Responsive)
 - TCO Enhancements
 - Account Table
 - Vehicle Replacement Report (Second Phase)
 - Report Center
 - Configurable Maintenance Dashboard
 - Maintenance Parts Inventory/Ordering
 - Maintenance Schedule Enhancements
 - Multiple Meters & Maintenance Enhancements
 - FAST Reporting

THANK YOU
