WAYS A SHARED VEHICLE FLEET CAN BENEFIT DRIVERS

Turn a cost-savings measure into a perk by selling drivers on the advantages of a shared fleet powered by FleetCommander.

A motor pool can be a great way to cut costs and right-size your fleet. However, employees who are accustomed to reimbursement checks or the “perk” of a company car may be resistant to sharing. How do you get buy-in from every driver? **Give them the ultimate perk:** round-the-clock access to a shared fleet that offers online reservations for a variety of newer vehicles, maintained and cleaned by an efficient fleet office.

1

More & Better Vehicles

A shared fleet saves big money. That gives you the opportunity to add late-model year sedans, fuel-efficient vehicles, SUVs, pickup trucks, vans, and more to the mix. Drivers can choose from various types and pick the right vehicle for every job, every time.

Fewer Responsibilities

Drivers who are assigned a company car practically own it — and that includes time-consuming responsibilities. In a shared-vehicle fleet, the fleet manager or motor pool supervisor handles tasks like preventive maintenance, license plates, registrations, and more.

2

Easy Reservations

Drivers can use any web browser to access FleetCommander's online scheduling feature 24 hours a day, seven days a week. Or grab a vehicle on the spot and go! It's flexible and easy.

3

No Lost Keys

Drivers love FleetCommander's key-management kiosk and automated dispatching system, which offers secure, 24/7 access and eliminates the need to deliver keys to coworkers within certain office hours. It's as easy as getting a boarding pass at an airport.

4

Unburdened Fleet Staff

FleetCommander eliminates email chains and manual data entry for vehicle reservations, mileage tracking, utilization reporting, maintenance scheduling, work order tracking, and more.

More Money

Pay for vehicles only when you use them! This can slash 75% or more in monthly costs. That savings translates into newer vehicles, and older, more costly units can be retired.
